

Crossing Over - The Basics of Evolution

By Edith Dempster

HSRC Press, South Africa, 2006. Paperback. Book Condition: New. 280 x 210 mm. Language: N/A. Brand New Book. For thousands of years, people have asked the question How did the world begin? While many cultures and communities have a faith-based answer to this query, the theory of evolution supplies a science-based solution. The crossing over workbook for teachers is an illustrated, interactive publication designed to help educators deal with these changes in contemporary science education. Divided into two parts, the first supplements the work of GET teachers, and the second provides support for FET educators. From 2006, the subject Life sciences will replace the subject known as Biology in the further education and training (FET) curriculum. As part of the new and revised Life sciences school curriculum, teachers and learners will soon be required to attain a basic understanding of the theory of evolution. Preparation for this subject will begin in general education and training (GET) classrooms. The workbook focuses specifically on assisting educators build their own understanding of genes, the mechanisms of inheritance and selection - the basics of evolution. Starting with cells and working through to genetic codes, the workbook uses diagrams, illustrations, text information and activity sheets...
